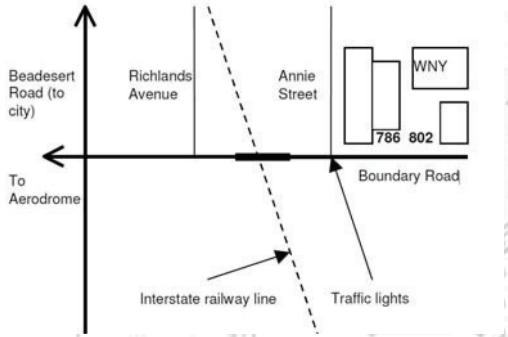
Wood N You

Trading hours

Monday – Friday 8:30 – 4 pm

Wood N You can save you time and money.

- No need to buy, lease, maintain or house expensive machinery.
- Use static machines not available for hire elsewhere. Please book.
- Advice on hand. Help can often be arranged with part or all of the job.
- Your materials can be delivered directly to us. No waiting around for trucks.
- A wide range of particleboard, laminates, MDF, plywood and cabinet timbers are for sale or often can be sourced on a days notice. Samples are available.
- Machining commonly done at WNY is for cabinetmaking, carpentry, shopfitting, boatbuilding, craftwork and the like.



In the interest of safety please

Obey staff instructions; ask if unsure. Advise staff if anything does not appear as you think it should. Be safety conscious for yourself and others. Leave machinery and the working environment safe for the next person. Remember that while machining, the smaller the piece of timber, the greater the chance of personal injury. Use push sticks etc. and position guards for maximum safety. Be aware of the danger of moving blades, cutters and drills etc. Always check settings. Wear appropriate clothing, shoes and safety equipment; no thongs or loose clothing. All incoming materials are to be checked by staff; for example, no asbestos, heavy metals or dangerous goods. Appropriate behaviour for a workshop is a must. Persons who appear to be under the influence of drugs or alcohol are not welcome. People under the age of 15 years are by law not allowed in the workshop. Your material on the premises is at your risk. All damage/breakages (for example, saw blades, cutters etc.) must be paid for. We endeavour to give fair notice but some prices are subject to change without notice. The management reserves the right to refuse entry to any person, or to request any person to vacate the premises. Management's decision will be final and without recourse.

General information

Here is a workshop where you are welcome, if you are competent, to hire equipment to saw, plane, thickness and sand your projects. We have panel saws, edge banders, cnc router for particle board work and planers, thicknessers, bandsaws, sanders and more for solid timber work. Your machine usage is calculated by the minute by our computer system. Our aim is to maintain machines to be accurate to ±1mm. You are welcome to visit and inspect the equipment to see what you can do but please phone to book time on machines and an operator if necessary. Operators are not always available and we do not provide a design service. We stock a wide range of board products including MDF, particle board and plywood with access to a huge range of melamine, veneered board and laminates in various sizes, colours, finishes and species. Once you have planned your job and are ready to machine it, phone 3274 5677 to book time on the machines and an operator if you are not competent. Operator lead times may vary.

How it works

When you are ready to begin your work session see WNY staff for a tag which enables you to use the workshop and allows the computer to track charges. From the time you receive an activated tag and until it is brought back to the office and deactivated you will be charged 'under the roof' (**UTR**). Mostly machine charges apply only while the machine is tagged on (the blue light is on). WNY staff can explain further and demonstrate.

Instruction

Although most of our customers are trade qualified, we offer handymen/women the opportunity to learn to use our industrial woodworking machines with one on one instruction. Booking is essential.

Booking information

Our customers try to run on time. Please be aware there could be bookings before and after yours. If necessary we may have to reschedule your machining for another time due to other bookings.

LABOUR PRICING

(calculated per minute or part thereof)	$hr
LABOUR (including advice, assistance and setting up) Machine operator (minimum $10)	$75

SAWS
